

# HOW TO USE

We offer different packages ranging from 50 to 20,000 pupae, in recyclable boxes ready for use (XS, S, M, L, and XL).

Boost Pollination Efficiency

Field-Proven

Long Shelf Life

Eco-Friendly

Biodiversity

Non-Aggressive

Higher Crop Yields

Better Harvest Quality

Ready-To-Use

**XL** 20k 10k

## 2 Emergence

Pupae to adult

14°C 4-7 days	30°C 2-5 days
12°C 5-10 days	24°C 3-7 days

Emergence of adults according to temperature.  
Pollinating activity starts within 36 hours after emergence.

## 3 Instructions

Follow the recommendations

- Avoid storing boxes in extreme heat or cold.
- Avoid direct exposure to rain or overhead irrigation systems.
- Protect from direct sunlight and UV radiation.
- Do not place heavy objects on top of hoverfly boxes.
- Leave space between boxes for hoverfly emergence.

## FLYING NATURAL POLLINATION

## 4 Pollination

Tips during pollination

- Birds might try to feed on the pupae.
- Hang boxes out of reach of predators.
- Sensitivity to pesticides and other chemicals.
- Some hoverflies might get caught in sticky traps.
- Provide water and sugar after the emergence.
